Motion number 95 Inner West Council NSW

That this National General Assembly call on the Australian Government to change the taxation code to eliminate incentives that reward activities and purchases that are worse for public health, are more expensive for households, result in worse domestic energy security, and worsen climate change.

The Assembly calls on the Federal Government to change the taxation code to address this, including:

1. Support residential and commercial landlords to improve the health, comfort, and energy security of their tenants by changing the status of energy-efficient, water-efficient, and renewable appliances and structures so that they qualify for accelerated depreciation or extension of the Temporary Full Expensing Measures for Landlords for a period through to 2030;
2. Amend the taxation system such that when a landlord replaces an appliance that has poor air quality outcomes with a cleaner system (e.g., gas cooktop with induction cooktop, or a gas heater versus reverse cycle air conditioner), this is also captured through the Temporary Full Expensing Measures for Landlords rather than a capital expense that is to be depreciated over its effective useful life;

3. **Increase the effective useful lives for those appliances that actively contribute to poor indoor air quality and worsened health outcomes such that the depreciation claim will be smaller in each year;**
4. **Factoring in the weight and energy source of a vehicle when deciding the allowable depreciation, in recognition that the damage done to roads is proportional to the fourth power of the weight, and thus increases rapidly for heavier vehicles (using a different scale for electric vehicles);**
5. **In order to improve public health due to air pollution and lack of physical activity, phase in changes to the way that motor vehicle expenses can be deducted to encourage the uptake of bicycles, e-bikes, and electric cargo bikes for commuting and business purposes, and in those cases where cars or other motor vehicles are required, make changes to ensure that electric vehicles are favoured over petrol and diesel vehicles; and**
6. **Call on the Federal Government to make these amendments to the relevant tax legislation to give effect to these measures as soon as possible.**
